

Afzal Hossen

Full Stack Software Engineer | Laravel · PHP · TypeScript · React.js

m.afzal6174@gmail.com | (+880) 1719-650 231 | LinkedIn | GitHub

Professional Summary

Full Stack Software Engineer with expertise in Laravel, PHP, TypeScript, JavaScript, and React.js. Experienced in building scalable web applications, REST APIs, and database-driven systems. Comfortable using AI coding tools while maintaining clean, maintainable code.

Experiences

Full-stack Developer · June 2025 – September 2025

Softopper

Developed and maintained PHP-Laravel client projects, implementing REST APIs, database design, and modern web features.

Built a full MERN-stack EdTech platform based on client requirements, including course management, role-based authentication, admin/student dashboards, enrollment workflows, and interactive learning modules.

Collaborated on redesigning the agency website's UI, improving state management efficiency, eliminating unnecessary re-renders, and implementing clean, maintainable code practices—resulting in a significantly enhanced user experience.

Education

BSc in Electrical and Electronic Engineering · 2011 – 2017

Shahjalal University of Science and Technology, Sylhet, Bangladesh

Training & Certifications

Reactive Accelerator – Learn with Sumit

Built strong hands-on experience in React development with hooks, state management, routing, APIs, and performance optimization.

Developed solid practical experience in scalable Next.js applications with App Router, focusing on performance, caching, rendering strategies, and production best practices.

Personal Projects

AI-Assisted Doctor Appointment System · Comprehensive Healthcare Booking Platform

PHP Laravel Redis Inertia.js TypeScript React.js

Source Code: github.com/afzal-php/ai-assisted_doctor_appointment

Developed a full-featured doctor appointment system with Laravel backend, featuring AI-assisted scheduling, patient management, and admin dashboard.

Implemented REST APIs, database design, Redis, Inertia.js, role-based authentication, and modern UI with TypeScript/React.js.

Form Builder · Robust Form Builder Platform

JavaScript React Next.js TailwindCSS Shadcn React Hook Form

Source Code: github.com/afzal6174/form-builder

Live: epear-form.vercel.app

Developed a reusable and scalable form builder system using Next.js 15, React 19, Shadcn UI, and React Hook Form, following modern best practices for performance and maintainability.

Implemented dynamic form creation, editing, and real-time preview with accessible and user-friendly UI.

Technical Skills

Languages: PHP , JavaScript , TypeScript

Backend Frameworks: Laravel , Livewire , Node.js , Express.js , NestJS

Frontend: HTML , CSS , Tailwind CSS , React , Next.js , Vue.js , Inertia.js

Database: MySQL , PostgreSQL , MongoDB , Redis

ORM/ODM: Prisma , Mongoose , TypeORM , Eloquent

APIs & Communication: REST API , GraphQL , Socket.IO , Apollo Server

Testing & QA: Jest , Vitest

Development Tools: Git , Postman , Docker

Packages & Libraries: NextAuth , Redux , React Hook Form , Axios
